PROFESSIONAL SUMMARY

Full Stack Developer with 2.7 years of hands-on experience building React.js applications and Node.js/Express.js REST APIs backed by PostgreSQL. Translated client requirements into business-critical HRMS features, including Vendor Billing with record locking, complex payroll and overtime calculations, and employee lifecycle workflows. Additional project experience with Next.js, TypeScript, MongoDB, and AI-assisted document processing.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript, SQL
Frontend:	React.js, Next.js, Redux, Redux Toolkit, HTML5, CSS3, Tailwind CSS
Backend:	Node.js, Express.js, REST API Development, JWT Authentication, Server-Sent Events (SSE)
Databases:	PostgreSQL, MongoDB
AI & GenAI (Project Experience):	RAG Fundamentals, Prompt Engineering, Text Embeddings, Semantic Search, LLM API Integration
AI & Cloud Tools:	Groq API, Qdrant Cloud, Supabase Storage, Gemini API
Tools & Testing:	Git, GitLab, Postman, Jest, Jira

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS)
July 2026 – October 2026

System Engineer
Hyderabad, India | On-site

- Completed internal certifications in React.js (Intermediate and Advanced), Front-End Development with React.js, Node.js Foundations, and Web Design; attended MERN Full Stack Development and Generative AI training.

Futurionic Private Limited
April 2024 – July 2026

Software Developer
Remote | Gurugram, Haryana-based company, India

- Gathered client requirements and translated workflows into full-stack HRMS features (React.js, Node.js, Express.js).
- Developed a Vendor Billing module with React.js and Node.js/Express.js, implementing billing workflows, form validation, REST APIs, and a locking mechanism to control modifications to billing records.
- Implemented complex payroll and overtime calculation logic with Node.js, Express.js, and PostgreSQL, covering payable-day validation, salary holds, arrear adjustments, and full & final settlement processing.
- Built employee onboarding, Aadhaar-related verification, and exit management workflows with approval actions, status tracking, and PostgreSQL-backed REST APIs.
- Created reusable React.js components (forms, tables, filters, modals) with Redux state management and REST API integration, including validation, loading states, and error handling.
- Resolved payroll calculation discrepancies, frontend validation issues, and API integration errors; reduced unnecessary API requests using lazy loading and section-wise data fetching.

Futurionic Private Limited
January 2024 – April 2024

Software Developer Intern
Remote

- Developed React.js components, integrated REST APIs, wrote basic PostgreSQL queries, and supported frontend testing and debugging under senior developer guidance.

PROJECTS

DocMind AI | RAG-Based PDF Question Answering Application

Tech Stack: React.js, Node.js, Express.js, MongoDB, Qdrant Cloud, Groq API, Supabase Storage

- Developed an AI-powered PDF assistant using Retrieval-Augmented Generation (RAG), enabling users to upload PDF documents and ask questions about their content.
- Implemented PDF text extraction, overlapping text chunking, and 384-dimensional text embeddings using the all-MiniLM-L6-v2 embedding model.
- Integrated Qdrant Cloud for vector storage and semantic search to retrieve relevant document content based on user queries.
- Integrated Groq API with an LLM to generate context-aware answers using retrieved PDF content, with prompt engineering to handle spelling mistakes and conversational follow-up questions.
- Implemented real-time AI response streaming using Server-Sent Events (SSE), private PDF storage using Supabase, and user-specific document access controls.

Three-Way Match Engine | AI-Assisted Procurement Reconciliation

Tech Stack: Next.js, TypeScript, Node.js, Express.js, MongoDB, Gemini API

- Used the Gemini API to extract structured data from Purchase Orders, Goods Received Notes, and Invoices, keeping AI extraction separate from deterministic reconciliation logic.
- Implemented SKU, quantity, price, and MRP matching with configurable tolerances, flagging discrepancies and classifying records as matched, partially matched, mismatched, or pending.
- Stored audit history in MongoDB and added a manual recomputation API to re-run matching after corrections.

EDUCATION

B.Tech in Mechanical Engineering | Punyashlok Ahilyadevi Holkar Solapur University — CGPA: 7.5 | 2023
